

End of Year Tax Planning Guide

YEAR END 2021 TAX PLANNING GUIDE

Business planning is always challenging but planning with a pandemic in the background is incredibly difficult given the uncertainty and international travel restrictions. Border closures have impacted supply chains and some industries have slowed dramatically. As a consequence, for many businesses, the number one priority right now is cash flow.

As we approach the end of the 2021 financial year, tax planning has never been more important and as accountants, we believe our client brief includes helping you minimise your tax liability within the framework of the Australian taxation system. The purpose of this newsletter is to highlight some end of year tax planning opportunities but you need to be proactive and act quickly to take advantage of these strategies. We encourage you to schedule a meeting with us as soon as possible to assess your tax planning options.

To assist you we have put together a list of strategies to consider before June 30 and note:

- To maximise benefits for the current financial year, we suggest you prepare a preliminary calculation of your taxable income for the year ending June 30, 2021 to identify the size of your likely tax debt and establish if you have a tax 'problem'.
- Review all tax-deductible expenses and assessable income in the latest available figures to determine the possibility of pre-paying some expenses before June 30 or deferring some revenue until after July 1, 2021.

Please note, the following list of tax planning opportunities is certainly not exhaustive and depending on your circumstances (including your turnover and whether you are on a cash or accruals method of accounting), some conditions may apply that restrict your use of these strategies. If you would like to discuss your tax planning options, we urge you to contact us today and most importantly, don't leave it until the last minute as some of these strategies require some time to implement.

Disclaimer: This newsletter contains general information only and no responsibility can be accepted for errors, omissions or possible misleading statements. It is not designed to be a substitute for professional advice and does not take into account your individual circumstances. Therefore, no responsibility can be accepted for any action taken as a result of any information contained in this newsletter.

Key Tax Minimisation Strategies

1. Delay Deriving Assessable Income

One effective strategy is to delay deriving your income until after June 30, 2021 by:

- a. Delaying the timing of the derivation of income until after June 30, 2021.
- b. Timing of raising invoices for incomplete work (businesses)

Where this strategy will not adversely affect your cash flow, consideration should be given to deferring the recognition of income until after June 30, 2021. Please note, delaying banking amounts received before June 30 until after June 30 does NOT qualify because the income is deemed to have been earned when the money is received or the goods or services are provided (depending on whether you are on a cash or accruals basis of accounting).

- Cash Basis Income - Some income is taxable on a cash receipts basis rather than on an accruals basis (e.g. rental income or interest income in certain cases). You should consider whether some income can be deferred in those instances.
- Consider delaying your invoices to customers until after July 1 which will push the derivation of the income into the next financial year and defer the tax payable on that income. If you operate on the cash basis of accounting, you simply need to delay receiving the money from your customers until after June 30.
- Lump Sum Amounts - Where a lump sum is likely to be received close to the end of a financial year, you should consider whether this amount (or part thereof) can be delayed or spread over future income periods.

2. Bringing Forward Deductible Expenses or Losses

Prepayment of Expenses - In some circumstances, Small Business Entities (SBE) and individuals who derive passive type income (such as rental income and dividends) should consider pre-paying expenses prior to 30 June 2021. A tax deduction can be brought forward into this financial year for expenses like:

- Employee Superannuation Payments including the 9.5% Superannuation Guarantee Contributions for the June 2021 quarter (that must be received by the Superannuation Fund by June 30, 2021 to claim a tax deduction).
- Superannuation for Business Owners, Directors and Associated Persons
- Wages, Bonuses, Commissions and Allowances
- Contractor Payments
- Travel and Accommodation Expenses
- Trade Creditors
- Rent for July 2021 (and possibly future additional months)
- Insurances including Income Protection Insurance

- Printing, Stationery and Office Supplies
- Advertising including Directory Listings
- Utility Expenses - Telephone, Electricity and Power
- Motor Vehicle Expenses - Registration and Insurance
- Accounting Fees
- Subscriptions and Memberships to Professional Associations and Trade Journals
- Repairs and Maintenance to Investment Properties
- Self Education Costs
- Home Office Expenses – desk, chair, computers etc.
- Donations to deductible gift recipient organisations
- If appropriate, consider prepaying any deductible investment loan interest. This could include interest payments on an investment loan for either an investment or commercial property or an investment portfolio you hold.

A deduction for prepaid expenses will generally be allowed where the payment is made before June 30, 2021 for services to be rendered within a 12-month period. While this strategy can be effective for businesses operating on a cash basis (not accruals basis), we never recommend you spend money on items you don't need. However, paying expenses in June that are due in July could save you some tax this financial year. Of course, this only works if you have sufficient cash flow to prepay the expenses.

Superannuation Contributions - some low or middle-income earners who make personal (after-tax) contributions to a superannuation fund may be entitled to the Government co-contribution. The amount of Government co-contribution will depend on your income and how much you contribute. (Refer to the Superannuation Section below for more information)

Capital Gains/Losses - Note that the contract date (not the settlement date) is often the key sale date for capital gains tax purposes and when it comes to the sale of an asset that triggers a capital gain or capital loss, you need to consider your overall investment strategy when making the decision to sell. Here are several important points regarding the management of capital gains and capital losses on sale of your assets from a tax planning perspective:

- (i) If appropriate, consider deferring the sale of an asset with an expected capital gain (and applicable capital gains tax liability) until it has been held for 12 months or longer. By doing so, you could reduce your personal income tax. For example, if you hold an asset for under 12 months, any capital gain you make may be assessed in its entirety upon the sale of that asset.

The Capital Gains Tax (CGT) Calculation Method*			
Individual Taxpayer	Date of CGT event	CGT payable on an asset held < 12 months	CGT payable on an asset held ≥ 12 months
	From 21/09/1999	Tax on 100% of nominal gain	Tax on 50% of nominal gain

*A capital gain will be assessable in the financial year that it's crystallised.

(ii) If appropriate, consider deferring the sale of an asset with an expected capital gain (and applicable capital gains tax liability) to a future financial year. By doing so, you could help reduce your personal income tax for the current financial year. This could also be of benefit if, for example, you expect that your income will be lower in future financial years compared to the current year.

(iii) If appropriate, consider off-setting a crystallised capital gain with an existing capital loss (carried forward or otherwise) or bringing forward the sale of an asset currently sitting at a loss. By doing so, you could reduce your personal income tax in this financial year. Note that a capital loss can only be used to offset a capital gain.

Accounts Payable (Creditors) - If you operate on an accruals basis and services have been provided to your business, ensure that you have an invoice dated June 30, 2021 or before, so you can take up the expense in your accounts for the year ended 30th June 2021.

Businesses should also consider:

- **Stock Valuation Options** - Review your Stock on Hand and Work in Progress listings before June 30 to ensure that it is valued at the lower of Cost or Net Realisable Value. Any stock that is carried at a value higher than you could realise on sale (after all costs associated with the sale) should be written down to that Net Realisable Value in your stock records.
- **Compulsory Superannuation Guarantee** – as mentioned above, if you want a tax deduction in the 2020/21 financial year, the superannuation fund must receive the funds by June 30, 2021. The Tax Office doesn't consider a contribution to be made until the amount is actually credited to a super fund's bank account so an electronic transfer to another bank account on June 30 is not necessarily considered paid. We strongly recommend you make the payment a week or so before June 30 and then follow up with the super fund to ensure the funds have been received. Don't risk the tax deductibility of what can often be a significant amount by leaving payment to the last minute.

- **Write-Off Bad Debts** – if you operate on an accruals basis of accounting (as distinct from a cash basis) you should write off bad debts from your debtors listing before June 30. A bad debt is an amount that is owed to you that you consider is uncollectable or not economically feasible to pursue collection. Unless these debts are physically recorded as a ‘bad debt’ in your system before June 30, 2021, a deduction will not be allowable in the current financial year.

- **Repairs and Maintenance Costs** – Where possible and cash flow permits, consider bringing these repairs forward to before June 30. If you don’t understand the distinction between a repair and a capital improvement, please consult with us because some capital improvements may not be tax deductible in the current year and could be claimable over a number of years as depreciation.
- **Obsolete Plant and Equipment** should be scrapped or decommissioned prior to June 30, 2021 to enable the book value to be claimed as a tax deduction.

- **Company Loss Carry-Back Provisions**

The loss carry-back offset introduced in the 2020/21 budget will be extended by a further 12 months, allowing corporate entities to carry back tax losses for the 2022/23 income year for up to four income years, as far back as the 2018/19 income year. The loss carry-back offset is available to corporate tax entities with aggregated turnover of less than \$5 billion and is intended to

complement the temporary full expensing measure where tax losses are generated through significant capital investments that give rise to immediate deductions. The measure allows for cash refunds with the lodgement of the tax return rather than future tax savings from carrying forward tax losses to later years and can provide additional cash flow to support working capital for companies who make tax losses after previously being in a taxable position.

The loss carry-back offset is limited to a company’s franking account balance and this limitation may prevent entities from accessing the measure where they have paid out franked dividends during the year.

- **Immediate Write Off for Individual Small Business Assets**

The accelerated depreciation and instant asset write-off concession for small businesses has been extended. The eligibility criteria and threshold for the instant asset write-off have changed over time. Any business with an aggregated turnover of up to \$500 million will be able to claim a tax deduction for each asset purchased and first used or installed ready for use before June 30, 2021. Qualifying assets can cost up to the \$150,000 threshold.

In addition, until 30th June 2022, **Temporary Full Expensing** means the instant asset

write-off thresholds don't apply as this allows an immediate deduction for:-

- the business portion of the cost of new eligible depreciating assets for businesses with an aggregated turnover under \$5 billion
- the business portion of the cost of eligible second-hand goods for businesses with an aggregated turnover under \$50 million
- the balance of a small business pool at the end of each income year in this period for businesses with an aggregated turnover under \$10 million.

In other words, for assets you purchased and first used (or have installed ready for use) for a taxable purpose from 7.30pm (AEDT) on 6 October 2020 to 30 June 2022, the instant asset write-off threshold does not apply. You can immediately deduct the business portion of the asset's cost under temporary full expensing.

Below is a table of the instant asset write off thresholds for small businesses applying the simplified depreciation rules:

Amount (Excluding GST)	Date of Purchase	Aggregated Turnover
\$150,000	From 12 th March 2020 to 30 th June 2021 (provided asset purchased before 31 st December 2020)	Up to \$10 million
\$30,000	From 7.30pm (AEDT) on 2 April 2019 until 11 th March 2020	Up to \$10 million
\$25,000	From 29 January 2019 until 7.30pm (AEDT) on 2 April 2019	Up to \$10 million
\$20,000	From 1 st July 2016 to 28 th January 2019	Up to \$10 million

Below is a table of the instant asset write-off thresholds for businesses with an aggregated turnover of between \$10 million or more but less than \$500 million:-

Amount (Excluding GST)	Date of Purchase	Aggregated Turnover
\$150,000	From 12 th March 2020 to 30 th June 2021 (provided asset purchased before 31 st December 2020)	Up to \$500 million
\$30,000	From 7.30pm (AEDT) on 2 April 2019 until 11 th March 2020 (provided asset purchased on or after 7:30pm AEST 2 nd April 2019)	Up to \$50 million

On face value the instant asset write off is a very appealing tax concession, however, there are a number of conditions you need to satisfy. Firstly, the asset must be used in the business for income-producing purposes. The Tax Office have stated they will monitor usage to detect 'rorts' so once you lodge your tax return you might get a 'please explain' letter from the ATO asking for more details.

Here are some key points to consider:

- For the instant asset write off the asset can be new or second hand.
- To be eligible, the asset must be purchased by a business turning over less than \$50m or \$500 million after 12th March 2020 (see above table)
- The amount must be under \$150,000 (depending on date of purchase – see table above as it could be \$30K or \$25K or \$20K) exclusive of GST (i.e. \$165,000, \$33K, \$27.5K or \$22K including GST)
- If you borrow to purchase the asset, the asset is still eligible
- The asset must be installed and ready to use by the deadline (purchasing a car to be delivered in July 2021 won't qualify until the car is actually delivered)
- To claim the write off on a motor vehicle you will need to have a valid log book and claim only that percentage of the cost as an immediate write off
- If you purchase a car for your business, the instant asset write-off is limited to the business portion of the car limit of \$59,136 for the 2020/21 income tax year
- Some taxpayers may try to reduce the cost of an asset to under \$30k (for purchases prior to 12th March 2020) by using a trade-in when purchasing the asset (for example a car). However, the monetary value of the trade-in will form part of the asset cost and not reduce the cost of the asset.
- Any attempt to manipulate invoices etc. will attract the ATO's use of the anti-avoidance rules, thereby eliminating the write off.
- If your business has a small profit or even a loss, the write off will be of little or no benefit in the current year (losses are not refundable but can be carried forward to the next year)
- Building structural improvements are not eligible for the instant write off
- If your pool balance at the end of the year is less than \$30,000 before applying any other depreciation deduction, the entire pool balance can be written off (\$150,000 if purchased post 12th March 2020 and before 31st December 2020)
- If your business is not a 'Small Business Entity' you will need to depreciate all assets purchased over \$1,000. Any assets purchased for \$1,000 or less can be written off immediately

- **Accelerated Depreciation Deductions**

- Newly acquired depreciating assets valued at more than \$30,000 (or \$150,000 post 12th March 2020) and not applied to the instant asset write off deduction can be added to the general business pool. As part of the

backing business incentive, an accelerated depreciation deduction of 57.5 percent for the business portion of the new depreciating asset applies for the cost of an asset on installation from 12th March 2020 to 30th June 2021 and existing depreciation rules apply (15 per cent for the first year and 30 per cent for subsequent years) to the balance of the asset's cost and for subsequent years. There is no limit to the cost of a qualifying depreciating asset eligible for this concession, but the asset must be new and not second hand.

CHECKLIST OF OTHER YEAR END TAX ISSUES

In addition to the tax planning opportunities, there are a number of obligations in relation to the end of the financial year including:

If you use a Motor Vehicle in producing your income you may need to:

- Record Motor Vehicle Odometer readings at June 20, 2021
- Prepare a log book for 12 continuous weeks if your existing one is more than 5 years old. Please note, if you commence the logbook prior to June 30, 2021, the usage determined will still be appropriate for the whole of 2020/21. As such, it is not too late to start preparing one for the current financial year. (Tip – the ATO has an App that can assist with keeping records such as business use logbooks - https://www.ato.gov.au/General/Online-services/ATO-app/myDeductions/?=Redirected_URL)

If you have started an account-based pension: Ensure that you have withdrawn the annual minimum required.

If you are in business or earn your income through a Company or Trust:

- **Employer Compulsory Superannuation Obligations:**

The deadline for employers to pay Superannuation Guarantee Contributions for the 2020/21 financial year is July 28, 2021. However, if you want to claim a tax deduction in the 2020/21 financial year the super fund (or Small Business Superannuation Clearing House) must receive the contributions by June 30, 2021. You should therefore avoid making contributions at the last minute because processing delays could deny you a significant tax deduction in this financial year.

- **For Private Company - Div 7A Loans** - Business owners who have borrowed funds from their company in prior years must ensure that the appropriate principal and interest loan repayments are made by June 30, 2021. Current year loans must be either paid back in full or have a loan agreement entered into before the due date of

lodgement of the company return. Failure to comply risks having it counted as an unfranked dividend in the individual's tax return.

- Preparation of **Stock Count Working Papers** at June 30, 2021.
- Preparation and reconciliation of **Employee PAYG Payment Summaries** (formerly known as Group Certificates). Note you are not required to supply your employees with payment summaries for amounts you have reported and finalised through Single Touch Payroll.
- **Trustee Resolutions** - ensure that the Trustee Resolutions on how the income from the trust is distributed to the beneficiaries are prepared and signed before June 30, 2021 for all Discretionary ("Family") Trusts. If a valid resolution hasn't been executed by this date, the default beneficiaries become entitled to the trust's income and are then subject to tax. Income derived but not distributed by the trust will mean the trust will be assessed at the highest marginal rate on this income.

SUPERANNUATION & TAX PLANNING

INCREASE IN SUPER GUARANTEE CONTRIBUTION RATE

From July 1, 2021 the compulsory Super Guarantee Contribution rate increases from 9.5% to 10%. The rate will increase again to 10.5% from July 1, 2022 and 11% from July 1, 2023.

The maximum super contribution base used to determine the maximum limit on any individual employee's earnings base for each quarter of 2020/21 is \$57,090 and for 2021/22 is \$58,920 per quarter. You do not have to provide the minimum support for the part of earnings above this limit.

CONCESSIONAL CONTRIBUTION CAP OF \$25,000 FOR EVERYONE

The tax-deductible superannuation contribution limit or cap is \$25,000 for all individuals regardless of their age and this cap increases to \$27,500 for the 2021/22 financial year.

- If eligible and appropriate, consider making the most of your 2020/21 financial year annual concessional contributions cap with a concessional contribution. Note that other contributions such as employer Superannuation Guarantee Contributions (SGC) and salary sacrifice contributions will have already used up part of your concessional contributions cap. If your total superannuation balance as at June 30, 2020 was less than \$500,000 you may be in a position to carry-forward unused concessional caps starting from the 2018/19 financial year. Members can access their unused concessional contributions caps on a rolling basis for five years and amounts carried forward that have not been used

after five years will expire. The 2019/20 financial year was the first year in which you could access unused concessional contributions and by making a concessional contribution to your super, you could reduce your personal income tax for this financial year and provide for your future retirement.

The Concessional Contributions Carry-Forward Provision (as an example)			
The 2020/21 Financial Year	Total super balance as at June 30, 2020	Unused cap carried forward from 2018/19 and 2019/20 financial years	The carried forward cap available at July 1, 2020
	< \$500,000	Up to \$50,000	Up to \$75,000

- If eligible and appropriate, consider utilising all or part of your 2020/21 financial year annual non-concessional contributions cap by making a non-concessional contribution. If you are not currently in a non-concessional contributions bring forward period, consider whether you may be in a position to 'bring-forward' your non-concessional contributions caps for the 2021/22 and 2022/23 financial years, and contribute up to \$300,000 for the 2020/21 financial year.

The Annual Non-Concessional Contributions Cap*		
The 2020-21 financial year	Total Super Balance at 30 June 2020	The Non-Concessional Contributions Cap Amount Per Annum
	\$1.6 million +	\$0
	< \$1.6 million	\$100,000

*A non-concessional contribution generally refers to an after-tax contribution that isn't (or can't be) claimed as a tax deduction by the contributor, e.g. personal contributions not claimed as a tax deduction and spouse contributions (for the recipient).

The Non-Concessional Contributions Bring-Forward Rule			
The 2020/21 financial year	Total super balance at 30 June 2020	The non-concessional contributions cap amount (including bring-forward)	Bring-forward period
	\$1.6 million +	\$0	N/A
	\$1.5 million to < \$1.6 million	\$100,000	1 year
	\$1.4 million to < \$1.5 million	\$200,000	2 years
	< \$1.4 million	\$300,000	3 years

The advantage of making the maximum tax-deductible superannuation contribution before June 30, 2021 is that superannuation contributions are taxed at between 15% and 30%, compared to personal tax rates of between 32.5% and 45% (plus 2% Medicare levy) for an individual taxpayer earning over \$45,000.

Typically, self-employed individuals and those who earn their income primarily from passive sources like investments make their super contributions close to the end of the financial year to claim a tax deduction. However, individuals who are employees may also use this strategy and those who might want to take advantage of this opportunity would typically include individuals:

- who work for an employer that doesn't permit salary sacrifice,
- who work for an employer that does enable salary sacrifice (but it's disadvantageous due to a reduction in entitlements), and
- who are salary sacrificing but want to make a top-up contribution to utilise their full concessional contributions cap.

GOVERNMENT CO-CONTRIBUTION TO YOUR SUPERANNUATION

The Government co-contribution is designed to boost the superannuation savings of low and middle-income earners who earn at least 10% of their income from employment or running a business. If your income is within the thresholds listed in the table below and you make a 'non-concessional contribution' to your superannuation, you may be eligible for a Government co-contribution of up to \$500.

To be eligible you must be under 71 years of age as at June 30, 2021. In 2020/21, the maximum co-contribution is available if you contribute \$1,000 and earn \$39,837 or less. A lower amount may be received if you contribute less than \$1,000 and/or earn between \$39,837 and \$54,837.

Tax Year	Maximum Entitlement	Low Income Threshold	High Income Threshold
2021/22	\$500	\$41,112	\$56,112
2020/21	\$500	\$39,837	\$54,837
2019/20	\$500	\$38,564	\$53,564

The matching rate is 50% of your contribution and additional eligibility requirements were added from 1 July 2017 which include:

- having a total superannuation balance of less than \$1.6 million on 30 June of the year before the year the contributions are being made
- having not exceeded your non-concessional contributions cap in the relevant financial year.

SALARY SACRIFICE TO SUPERANNUATION

If your marginal tax rate is 19% or more, salary sacrificing can be an effective way to boost your superannuation and also reduce your tax. By putting pre-tax salary into superannuation instead of having it taxed at your marginal tax rate you may save tax. This can be particularly beneficial for employees approaching retirement age.

SELF-MANAGED SUPERANNUATION

A Self-Managed Superannuation Fund (SMSF) can provide significant tax savings but they don't suit everyone. There are significant regulations surrounding the management and administration of SMSF's. With the end of the financial year approaching, now is a good time to discuss the pros and cons of establishing your own SMSF. It might be appropriate to establish a SMSF in conjunction with other tax planning opportunities. If you would like more information about self managed superannuation funds we invite you to consult with us today.
